UNIDEN.COM.AU

*Parking mode works only with the included Hard Wire Kit and when the car and the unit has been powered off, this mode turns on the unit if it detects vibration. The unit must have sufficient external power supplied in order to record and the G Sensor must also be turned on. †128GB is the maximum capacity Micro SD Card (32GB card included), Uniden recommends using UHS-II cards with UHS Speed Class rating with minimum class 10 for minimum write performance of 10 MB/S. † Image on packaging is for illustration purposes only. Captured footage is dependent on the position and location of the vehicle dash cam &/or rear camera. ^2.5k (2560 x 1440) video resolution, 5 Megapixel Sony Starvis Sensor. 4k (2160p) resolution being twice the vertical resolution of 1080p.
