EXPERIENCE THE SOUND
OF THE FUTURE

CALIBRE

Experience the best of sound with CALIBRE, where decades of expertise meet passion for audio. Our team of experts is dedicated to delivering an exceptional listening experience. With a focus on precision and detail, we bring you the latest technology at an affordable price, so you can enjoy your favourite music with crystal clear clarity.

Explore our latest models and discover the innovative features that will make CALIBRE your first choice.

ELITE 9WL

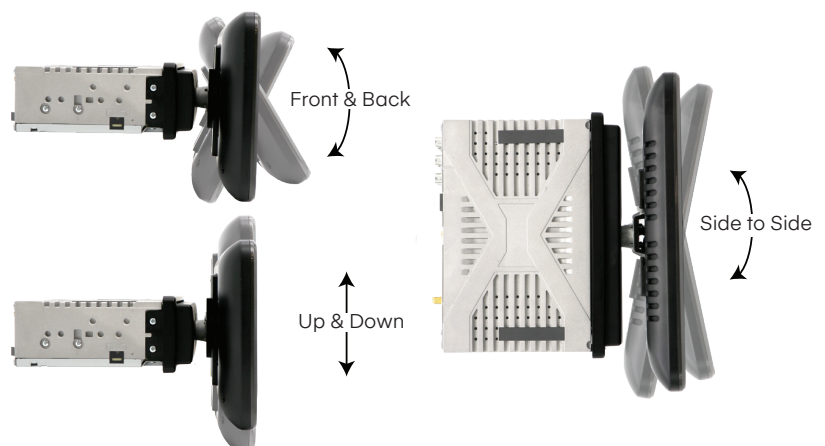

9 Inch Floating Wireless Apple Carplay® / Android Auto™ A/V Receiver

The ELITE 9WL is loaded with premium features designed to enhance your entertainment experience. Enjoy seamless connectivity with wireless or wired Apple Carplay® and Android Auto™, crystal-clear audio with DAB+, and a high-resolution screen for crisp visuals.

With dual camera inputs for convenient parking assistance and the ability to connect two phones simultaneously, this multimedia system is the ultimate upgrade for your vehicle. Upgrade your ride with the ELITE 9WL and elevate your entertainment on the move.

The 1-DIN chassis allows the unit to be installed into a wide range of vehicles. With a vertical and horizontal pivoting joint you can adjust the screen to an angle that you prefer.

The screen can also be adjusted up or down during installation to help avoid obscuring controls or vents.

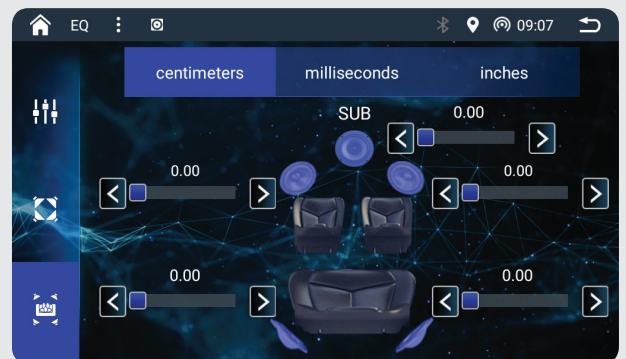

We told you that we're passionate about audio, that is why we include all you need to get the best possible sound experience out of your new entertainment system!

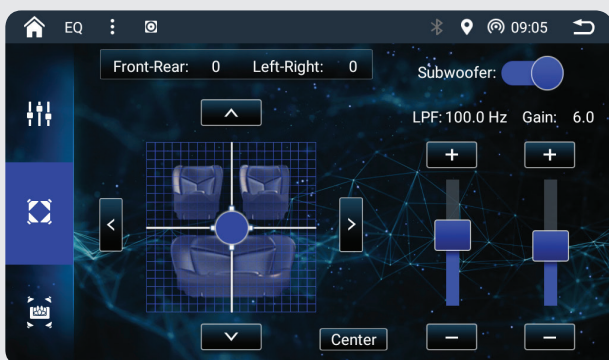

16 BAND EQ

Select a preset that matches your music genre or modify one of the two user presets to balance out highs or lows in your system's frequency response, or customise the sound to your individual preferences.

TIME ALIGNMENT

Since all vehicles vary in size and have speakers placed in different locations, adjusting the timing of each speaker can provide you with the optimum concert sound stage experience.

BASS MANAGEMENT

Take control over your Subwoofer's performance (if installed) by choosing from the 11 Low-Pass filter frequencies and adjusting the output level.

HIGH-PASS FILTERS

In order to maximise the performance of your front and rear speakers, the ELITE 9WL offers a total of 36 Hi-Pass frequencies for the Front speakers and another 36 for the Rear speakers. This feature enables you to effectively filter out frequencies that are not suitable for your speakers, leading to extended lifespan, improved power handling, and enhanced sound quality.

Bit too much tech for you to manage?

Don't worry, contact us and we will direct you to the nearest Calibre Specialist to assist.

ELITE 7WL

6.8 Inch Wireless Apple Carplay® / Android Auto™ A/V Receiver

Like our flagship ELITE 9WL, the ELITE 7WL and ELITE 7W models are loaded with premium features designed to enhance your entertainment experience. Offering Wireless or Wired Apple CarPlay® and Android Auto™, High Resolution screens, Dual Camera inputs, and simultaneous 2 Phone Connectivity, these models provide a wealth of multimedia options. Both models are equipped with Ultra High Power 2Ω stable amplification, making them a powerful upgrade to your factory system.

ELITE 7W

6.8 Inch Wired Apple Carplay® / Android Auto™ A/V Receiver

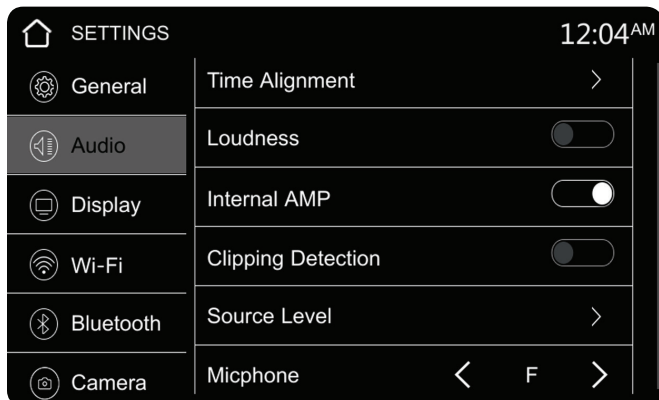

Check out these standout features that are sure to enhance your multimedia entertainment experience while on the move!

HIGH POWER 72W x 4 AMPLIFIER

The ELITE 7WL and ELITE 7W have built-in 2Ω stable Class A/B amplification, delivering up to 72Wx4 MAX output @ 2Ω (38Wx4 RMS @ 1% THD).

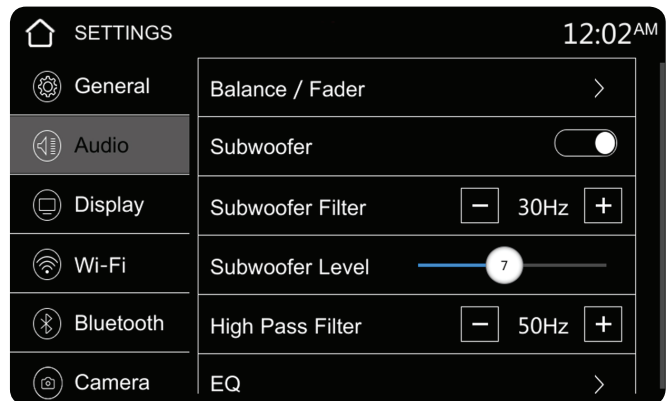

They also output 22W RMS @ 4Ω with only 1% THD, outperforming competitors. When only using external amps, the in-built amp can be turned off in the menu for lower current draw and a pure audio output signals.

DISTORTION LIMITER

Committed to delivering exceptional sound quality, we've incorporated a cutting-edge distortion limiting feature. This intelligent system detects any distortion (clipping) above 2% Total Harmonic Distortion (THD) and automatically adjusts the level to maintain crystal-clear sound, ensuring your listening experience remains pristine and unblemished.

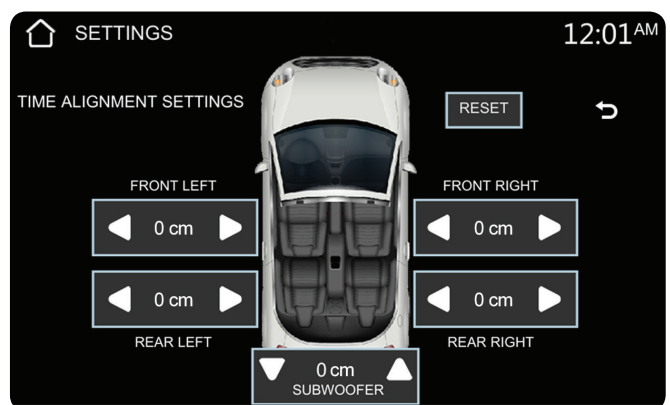

Additionally, this feature safeguards your speakers from potential damage caused by excessive distortion, providing added peace of mind for the ultimate listening experience.

HIGH-PASS & LOW-PASS FILTERS

To maximise the capabilities of your front and rear speakers, the ELITE 7WL & ELITE 7W are equipped with a selectable Hi-Pass feature. This feature is designed to eliminate frequencies that may cause damage or distortion to your speakers, ultimately leading to enhanced longevity, increased power handling, and crisper sound quality.

These models also include a Subwoofer (if installed) Low-Pass filter with various frequency choices to effectively eliminate vocals and focus on lower frequencies. Additionally, you have the flexibility to adjust the Subwoofer level to suit your preferences and optimise your audio setup.

TIME ALIGNMENT

Since all vehicles vary in size and have speakers placed in different locations, adjusting the timing of each speaker can provide you with the optimum concert sound stage experience.
